MISSION ENGINEERING · DIGITAL TRANSFORMATION OF THE OFFICE

# Engineered from the mission down.

Mission need flows down and evidence flows up. The triad decomposes the mission into tasks. Stratos makes those tasks effective (Measure of Effectiveness), and MACH1 delivers the capability and performance beneath them (Measures of Capability and Performance). Mission Control steers it all against mission success (Measure of Success).

**THE TRIAD** · mission need, user insight, and priority, decided together

**The mission and its people**
analysts, operators, and leaders

**Tradecraft experts**
define how the mission's work is done

**HCD / UX team**
research users and design the experience

**Requirements Management**
owns the prioritized backlog

backlog

tradecraft and workflows

research and designs

requirements

## Project Stratos · Experience, top down

Metrics: product analytics + support

**Engage** the Workforce

**Empower** the Users

**Evolve** the Capabilities

**Enable** the Developers

**Red lines:** No user left stranded · Nothing ships without the user in the room · No surprises on day one · The human stays in command · Outcomes, not activity

product analytics

defines journeys, look, and learning

**ENGINEERING**

**Stream-aligned teams**
deliver mission outcomes

**Platform teams**
build and run MACH1

steer

## Mission Outcomes

What everything here is engineered to achieve.
Delivered through SuperApps and SI

outcome evidence

delivers platforms, data, and SI

## Project MACH1 · Architecture, bottom up

Metrics: technical telemetry

**Strengthen** the Foundation

**Standardize** the Platforms

**Streamline** the Portfolio

**Scale** the Intelligence

**Principles:** Verifiable · Composable · Connected · Resilient · All self-hosted on the IDP, no single-hyperscaler lock-in

technical telemetry

priorities and funding

## Project Mission Control

Ways of working, across everything

**Align** the Work

**Accelerate** the Flow

**Amplify** the Teams

**Adapt** the Course

**Metrics: programmatic delivery and DORA.** The instrument panel shows all three layers live

live evidence

**LEADERSHIP STEERS** · Live evidence drives where to invest, adjust, or accelerate, and the loop repeats

**Shared timeline:** foundation work October to December 2026 · first user-facing SuperApp deployments January 2027
